---

Hi Kevin:

I should have a copy of this review for by tomorrow morning, I have also attached a copy of Acute Tox review for the product as well. Sorry for any inconveniences.

Regards

Zebora

John,

I just sent an e-mail to Dr. Laniyan in response to a phone call we had right before he left for holiday. You were cc on the e-mail. I believe I addressed the issues that were in his efficacy report as it pertains to the renegotiation.

Could you please send me the product chemistry review for the product? I have not heard if there were any issues related to product chemistry.

Warm Regards,

Kevin Kutcel

Hi Kevin – Before we renegotiate, can you please let me know how you intend to address the COA/LCL issue? Ibrahim is out of the office through the holidays.

Thanks,  
John

**Subject:** 75 Day Letter - PRIA 95700-E

Zebora,

Per your 75 day deficiency letter (Decision No. 564512) for EPA Reg. No. 95700-E, the registrant would like to establish a new PRIA due date that will allow enough time to resolve the outstanding issues regarding the efficacy review (DB Barcode D459604). I have been in contact with Dr. Laniyan and I am confident that the issues can be resolved in a timely manner. The issue of the absorbency study was quickly resolved as he did not receive the study (MRID No. 51206109) that had been submitted with the package. Once he reviews the absorbency study, we agreed then to discuss the issue of the COAs. Please let me know if I need to provide any additional comments or information. Your cooperation is appreciated.

Warm Regards,
